Europe's General Data Protection Regulation (GDPR) will come into effect on 25th May 2018, leaving all organizations doing business in the EU - or storing data belonging to an EU citizen - with less than 9 months to meet the requirements of the regulation.

Organizations must implement a security strategy that supports compliance and minimizes their exposure to the new breach notification

requirements and financial penalties, as high as 20 million Euros or 4% of total annual turnover.

Still figuring out how your organization is going to comply? What actionable steps you should be taking today?

This event will provide expert speakers, information and insight to help your business comply with GDPR before it goes into effect.

Registration fee CHF 100.00, including entrance, presentation materials, morning beverages, networking lunch
