With the Infrastructure Investment and Jobs Act, the Inflation Reduction Act and the CHIPS Act, President Biden has presided over a largest increase in stimulus spending since the New Deal in the 1960's. For Swiss companies, these massive programs will bring great opportunities in infrastructure, green energy, health care/ pharma and in automated factory floors, all sectors where Swiss companies are among the world champions.

We will present the results from the Accenture & Swiss Amcham research and we will discuss with top managers from Swiss companies how they plan to approach the great opportunities and how they will tackle the challenges.
